My Summary

35-year old, experienced Software Engineer based in Copenhagen with over 11 years at the same company, blending strong technical skills with a passion for design and usability.

I care about clean design, efficient systems, and continuous improvement. Recently, I've been exploring AI in depth and I generally love exploring new technologies.

My sparetime is spent with family, fitness and I have a huge interest in gaming.

My Experience

Senior Software Developer

Pointsharp, August 2014 – Present

- Focus on building clean, responsive interfaces with attention to detail in design and user experience.
- Develop scalable, maintainable systems with a strong emphasis on performance, security, and clear architecture.
- Enjoy bridging frontend and backend to deliver complete, cohesive solutions that function seamlessly end to end.
- Generally honed my skills as a developer with years of experience and customer collaboration.
- Gradually increased my responsibility areas and involvement in processes and guiding others.

My Education

Digital Media Engineering

MSc in DTU | Graduated in 2014

- Excelled in both of my thesis
- Attended DADIU – Developing Computer Games
- General high-level development principles
